CORAL KIDZ CLUB

The recently launched \$2 million, 40,000 sq-ft state-of-the-art Coral KidZ Club is the newest draw for guests at the award-winning Grand Fiesta Americana Coral Beach. Said to rival any other children's program of its kind in Latin America, the new high tech club is sure to captivate the resort's Generation Z guests with more than 40 indoor and outdoor activities.

Designed for children 3 - 12 or 'Gen Z-ers,' the club takes make-believe and the playground concept to another level. Spaces offer individually designed zones for various age groups with customized technology and hand painted artwork.

The outdoor area offers remote controlled toy vehicles for multigenerational competitions throughout the resort.

A host of activities - including a Jungle Room - will inspire tots, while 'tweens and teens will be mesmerized by an illuminated arched portal transporting them to the computer zone and futuristic gaming area.

The Maya culture is highlighted in an interactive 30 square foot LED wall with an electronic game, which teaches kids about that ancient culture via interactive play and fun facts.

Children earn rewards from playing these games and can claim their prizes throughout the hotel.

An outdoor electronic system for the playground, combines the speed and fun of video games with the lively movement of aerobic exercise. Traditional Mexican sidewalk games can be found throughout.
